

Tribal Self-Determination Solutions

Comprehensive software applications that enable tribal **self-governance** and **self-management**, and integrate **decision-support** solutions

Tribal·D™

Integrated Tribal Resource Management Solutions

Tribal-D™ provides Native American tribal governments with a uniquely comprehensive software solution called TribeVue.™ As a fully integrated resource planning system, TribeVue is specifically tailored to assist with tribal governance and business needs. Our decision-support software enables tribes to more fully track and achieve objectives in self-management and self-determination.

Native American tribes are rich in heritage, human capital, natural resources and self-determination. The challenge for most tribes is how to integrate and self-manage these vast resources. Tribal-D provides tribal governments with unprecedented off-the-shelf software support and tools to better inventory, track and manage all assets within one system. TribeVue also modernizes the use and storage of protected data — facilitating improvements in resource management, performance and security.
