Sustain Profitable Businesses

TribeVue™ is a fully integrated, tribal resource planning system by Tribal-D™ that complies with the latest standards in information assurance and data protection protocols.

Sustaining viable business on Indian reservations is critical for economic development for Native American communities. Executive leadership teams overseeing Tribal enterprises benefit from monitoring strategic plans for their businesses and holding the business managers accountable for results. TribeVue™ apps provide and integrated database approach to set strategy and objectives for revenue, expenses and profitability to measure sustainable progress for Tribal businesses.

TribeVue Module Apps That Help Sustain Profitable Businesses are:

Gaming

Hotel

Retail

Enterprises

Tribal-D's **Tribal Resource Planning** (TRP) model enables the integration of applications and data that help Tribal governments manage vital program functions to have real time program execution data and outcomes for proactive decision-making.
