

Software application solutions designed to:

# Optimize Revenue

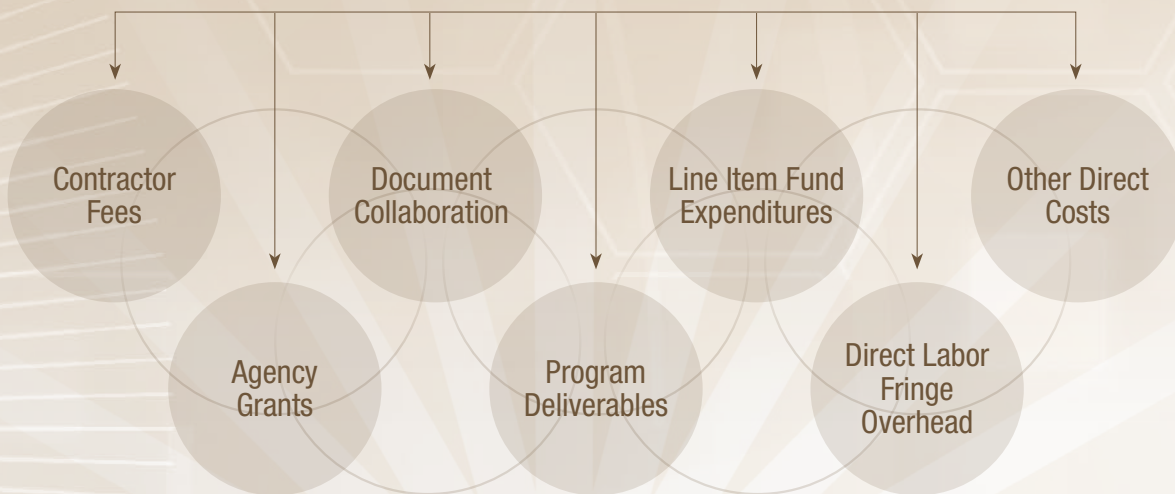

TribeVue™ is a fully integrated, tribal resource planning system by Tribal-D™ that complies with the latest standards in information assurance and data protection protocols.

As funding is appropriated to a tribal program, this set of TribeVue apps focuses on budgets and performance. Data-supported audit trails track appropriated monies through various tribal departments. Program execution, labor and other direct costs are tracked and mapped to specific outcomes. Further, all deliverable documents are kept within each grant. Our integrated proprietary applications track and store: each revenue source; agency deliverable compliance, program level labor and direct cost allocation; and budgeted vs. actual funds consumption.

TribeVue Module Apps That Help Optimize Revenue are:

- ▶ TD Collaborate™
- ▶ TD RTS™  
*(Revenue Tracking & Sources)*
- ▶ TD LIFE™  
*(Line Item Funds Expenditures)*
- ▶ TD TERO™  
*(Tribal Contractor Fees)*

Tribal-D's **Tribal Resource Planning** (TRP) model enables the integration of applications and data that help Tribal governments manage vital program functions to have real time program execution data and outcomes for proactive decision-making.

## Tribal·D™

Decision Support Systems for Tribal Governments

# Optimize Revenue

The TribeVue 'Optimize Revenue' module apps focus on the financial and compliance aspects of Tribal programs with the following integrated features:

► **TD Collaborate:** *Increase Program Manager Productivity*

- Track, search documents and folders
- View program milestones in Calendar format
- Run 'blogs' and discussion threads on various topics
- Track critical action items

► **TD RTS:** *Program Resource Tracking System*

- Track, search all revenue sources, contracts, contractor agreements
- Manage program-level time entries per person
- Track a program points of contacts, deliverable schedules, data submittals
- Apply data level security for controlled access

► **TD LIFE:** *Line Items Funds Expenditures*

- Track budgeted contract/grant line items and actual line item expenses
- Import time entries
- Apply overhead, fringe rates for labor cost calculations
- Generate graphical reports for program managers

► **TD TERO:** *Tribal Employment Rights Ordinance*

- Track Tribal contractors and fees
- Track employer inspections
- Track employment discrimination complaints
